EXPERIENCE

Apna Mart | Flutter Developer

Jan. 2026 – Present

- Working on the iOS and Android side of the *Consumer App*.
- Did the Revamp of **Onboarding** flow from Splash to Home Page.
- Built a config gated **floating offer nudge banner** on cart items to surface offer visibility.
- Made force/soft **App update** dialogs server driven (heading, description, remote icon with fallback)
- Standardized **currency formatting** and rounding logic across cart, offer tags, and MRP displays.
- Added **Google Phone Number Hint** to Android (native) onboarding, removing manual entry at signup.
- Optimized the **Google Places integration**, cutting per request API billing and response payload size.
- Built **Welcome Gift** feature implementing dynamic widget, cart level logics, targeting first order conversion.
- Developed a cross page **Product Recommendation Rail feature** across Home, Search, and Category pages.
- Led full app wide **localization** for Hindi and Bengali, with in app language switching from the profile page.
- Rebuilt the **GPS & location permission** flow for iOS/Android, handling location, denials, & fallback states.
- Implemented **edge to edge system** UI styling with safe area handling for bottom sheets and keyboard layouts.
- Resolved **production issues** spanning payment flow, cart logics, monthly crashlytics, app size, and UI overflow.
- Built **multi phase UI animations** with **AnimationControllers** for recommendation rails entrance, auto scrolling carousels, and scale transitions for offer prices.

Ente | Software Engineer Intern

Aug 2025 – Oct 2025

- Contributed to the development of **Photo** app at ente.io
- Redesigned bottom sheet and components for gallery, albums and people selection tabs.
- Implemented adaptive UI features across app like **collapsing & expanding on scroll**.
- Updated the grouping of icons and swiping logic.

Imagined | Flutter Intern

Oct 2024 – Nov 2024

- Contributed to the development of **Solo**, a platform connecting 100+ brands and influencers.
- Created the Referral screen and Home Carousel, including frontend updates to 4-5 cards.
- Redesigned the KYC and Payouts sections, improving usability for 1,000+ users.

PROJECTS

OMNIA | Flutter, Dart, Firebase

Mar 2024

- A platform for 100+ community members to connect, collaborate, and access club resources.
- Built 20+ user friendly pages for home, community, work, tenure recap and profile screens.
- Features include event posters, member profiles, social links and role-based authentication with firebase.

OPEN SOURCE

CCExtractor Development | Ultimate Alarm Clock

- fix: rectified the button size of UAC for all screen types.
- fix: layout shift of timer hover buttons.
- fix: fixed the overflow of timer button.

PR #717 
PR #742 
PR #738 

SKILLS

Languages & Frameworks: Dart, Flutter, Swift (Learning), Firebase, Python.

Tools & Environment: Git/GitHub, Android studio, Xcode, Transporter, VS Code, Linux, Claude code.

State Management & Architecture: Provider, Bloc, Feature First, MVVM.

EDUCATION

Jaypee University of Information Technology

May 2026

B.Tech in Computer Science Engineering

CGPA: 7.6
